

Water Pollution

Some common sources of water pollution are lawn fertilizer applications, decaying lawn debris (such as grass clippings and leaves), detergents, sewage or septic tank runoff, animal wastes, and industrial wastes.

What you can do to prevent water pollution??

- [Volunteer at your local water quality program](#)
- [Identify and properly dispose of hazardous waste](#)
- [Use less toxic alternatives](#)
- [Pick up after pets](#)
- [Use fertilizers appropriately](#)
- [Tune up vehicles](#)
- [Repair leaks](#)
- [Wash at a car wash or on the grass](#)
- [Recycle/properly dispose of batteries, oil, fluids, antifreeze, polishes and cleaners](#)
- [Drive less!](#)
- [Ride your Bike!](#)
